Domains

A domain name helps internet users to identify a website. It's the name that people type to find you. We think the best domain names (URLs) are ones that are short, easy to remember, and capture the essence of your business.

Not certain if you're a *'com'* or *'org'*? Let us help you decide which domain extension is right for your business. And if the domain name you're after is already registered don't panic, we can suggest alternatives.

So whether you'd like us to register a new domain name on your behalf, place one on *'back order'*, or take over the management of one you already own - get in touch.

Whether you need a simple on-line presence, or full e-commerce website, we can help. First our designers establish your requirements, and then create a homepage layout for you to agree.

Once you've settled on a homepage, we build sub-pages and populate these with content (including social media) until your website is completed. Let us know the types of website you like and then we can shift the emphasis of our designs accordingly.

And by coding your website with the needs of search engines in mind, we greatly improve the likelihood of visitors.

We can call upon many years experience, to move traffic in the direction of that fabulous new site of yours. Our ethical approach does take time, but it generates quality traffic and a surge in visitors / enquiries. Typically this takes 3-6 months, but some keywords will take considerably longer.
